

Week 14: 22.06.2020: Learning Project - Space

Age Range: Year 1

Weekly Reading Tasks	Weekly Phonics Tasks
<p>Monday- Select a book and imagine they are reading it in space. Try reading it with a flashlight just before bedtime.</p>	<p>Monday- The word 'space' contains the sound 'a-e'. List as many words as they can containing the 'a-e' sound. Your child might identify words that contain an alternative spelling for 'a-e' such as ai/ay/a.</p>
<p>Tuesday- Listen to Look Up! read by the author and then take part in a drawing session with the book's illustrator.</p>	<p>Tuesday- 'there', 'move', 'climb', 'fast' and 'behind' are some of the words that children need to be able to spell. Use these to write sentences about a rocket travelling into space.</p>
<p>Wednesday- Take a look at these facts about space and read them together. Planets on Oxford Owl has further facts. Answer any further questions about space that you could investigate.</p>	<p>Wednesday- Look at the words: want, wash, wasp, wand, swallow, squash, swap, squad, swamp, watch. Sound out the words and identify how the letter a should be pronounced in each of these words (o). Explain that when 'w' comes before vowels it can affect the pronunciation of the vowel.</p>
<p>Thursday- List any space related words from the books they have read or listened to this week. Write the meanings of each word.</p>	<p>Thursday- Write the names of the planets on separate pieces of paper and practise reading them. Order them alphabetically.</p>
<p>Friday- Listen to Beegu here. Write a character description about Beegu (looks like, acts like, type of creature, etc). Encourage them to reference events from the story.</p>	<p>Friday- Play the online game 'Yes/No Yeti'.</p>
Weekly Writing Tasks	Weekly Maths Tasks- Length and Height
<p>Monday- Design their own rocket and create a bank of adjectives to describe it and verbs to describe how it moves.</p>	<p>Monday- Find a book in your house. Find three items which are longer than the book and three items which are shorter. Order the items from longest to shortest. Measure the items in centimetres to work out the difference in lengths.</p>
<p>Tuesday- Now that they have designed their rocket, create an advertisement of the rocket launch. How much will it cost? What time will it launch? Is there anything else on offer?</p>	<p>Tuesday- Write down the name of each family in order from tallest to shortest. Is the tallest person the oldest person or not? Discuss why this might not be true. They could measure family members using a measuring tape.</p>
<p>Wednesday- Plan their own trip to space – think about what will they take and what will they do there? Record this in a timetable.</p>	<p>Wednesday- Play level 1 of this game to practise measuring things with a ruler. Write handy hints for using a ruler e.g. start at 0.</p>
<p>Thursday- Research facts about a planet and then create a fact file about their</p>	<p>Thursday- Look outside, in your garden or on your walk, find things that are taller</p>

chosen planet. This could be Earth.	than they are and things that are shorter than they are.
Friday- Watch the Disney short “La Luna” here . Write a short diary entry about the star crashing into the moon.	Friday (theme)- Design a logo for their rocket. They must include the following 2D shapes: rectangle, triangle, hexagon and heptagon.

Always check the Google classroom daily, for different activities and games.

Spell these words: **petals, fruit, roots, most, least, add, bulb, seed, subtract, branches**

Learning Project - to be done throughout the week

The project this week aims to provide opportunities for your child to learn more about space. Learning may focus on our Solar System, the Sun and the Moon. It could look at life in outer space from the view of an astronaut and travelling through space.

- **Our Solar System-** Talk about what they already know about space and create a mind map. Name the planets in our solar system. Use [the Solar System Song](#) to create a diagram showing the order of the planets. Or make real ones using balloons, paper mache and paint.
- **Astronaut Aerobics-** Astronauts have to be fit and agile for their missions into space. Design a home workout and put your agility to the test! You could even use [Mr Garcia's](#) video to help. Then, plan a day of healthy eating for the aspiring astronauts thinking carefully about each food group.
- **What are Day and Night?-** Share the video of [day and night](#) with your child. Watch the video and then create a poster about day and night explaining why we have day and night. Play the quiz and see how many answers you can get right!
- **Rocket Creation-** As part of their writing tasks, your child has designed a rocket. Now, create their rocket using objects they can find in the home such as cardboard boxes, newspapers and tin foil. Write a set of instructions to share with a family member or friend Take photos and share them on Google classroom.
- **Is There Anything out There?- Tim Peake** is a famous British astronaut. Record the questions they would ask him if they could interview him. Answer the questions in role as him. Design a new space suit for him. What would make a good space suit?

STEM Learning Opportunities #sciencefromhome

Mission X – Astro Food

- Collect a variety of plant foods from home or download the cards from [this](#) resource.
- Group the food/cards e.g. fruits, seeds, vegetables. Which parts are edible?
- Sign up and access all of the Mission X resources [here](#).

Additional learning resources parents may wish to engage with

- Further activities at [Nasa for Kids](#).

- [White Rose Maths](#) online maths lessons. Watch a lesson video and complete the worksheet (can be downloaded and completed digitally).
- [Numbots](#). Your child can access this programme with their school login.
- IXL- Click here for [Year 1](#). There are interactive games to play and guides for parents.
- [Mastery Mathematics Learning Packs](#) Learning packs with different activities and lessons. Includes notes on how to do these activities with your children.
- [Y1 Talk for Writing Home-school Booklets](#) are an excellent resource to support your child's speaking and listening, reading and writing skills.

The Learning Projects are based on the **National Curriculum expectations** for the key stage which your child is in. It may be that your child finds the tasks set within the Learning Project for their year group too simple. If this is the case, then we suggest that your child accesses the Learning Projects which are set for the key stage above. Equally, if the projects are too challenging, then we advise that your child accesses the projects for the key stage below.

If your child requires more of a challenge, or you believe that there are some gaps in their learning then [Century Tech](#) is a fantastic resource that is currently free for home learning. The app is designed to address gaps and misconceptions, provide challenge and enables children to retain new knowledge. It uses artificial intelligence to tailor the learning to your child's needs. Sign up [here](#).
